Experience

Freelancer, Tribe, Singapore

August 2022 – Present

Freelance Developer (Tribe)

I am working on various freelance projects focusing on web development, database management, and Web3 technologies. Develop and maintain responsive web applications using modern frameworks, ensuring smooth user experiences. Design and optimize databases for efficient data handling and performance. Collaborate with clients to deliver tailored solutions that meet specific business needs. This role demonstrates a strong grasp of full-stack development and database optimization.

• Software Specialist(Intern), Cubic Logics, Abohar

June 2023 – September 2023

Test the TMP App as tester

Functionality: Ensure core features like login, navigation, and data input work correctly. Usability: Check for ease of use and clear navigation. Performance: Test speed and responsiveness under varying conditions. Security: Ensure data privacy and prevent unauthorized access. Cross-Platform: Verify compatibility across devices and browsers.

• Computer Operator, Hitachi, Abohar

July 2019 – May 2021

Johnson Control,Hitachi(Company)

Managed day-to-day operations of computer systems and equipment, ensuring optimal performance and reliability. Assisted in troubleshooting hardware and software issues, providing timely solutions to minimize downtime. Monitored system performance and conducted routine maintenance to prevent technical problems. Collaborated with team members to enhance service efficiency and improve customer satisfaction. Maintained accurate records of service requests and repairs, contributing to effective inventory management. This role highlights strong technical skills, attention to detail, and the ability to work collaboratively in a fast-paced environment.

Technologies

• **Frontend:** •HTML •CSS •JavaScript •ReactJS •Context API •Tailwind CSS •Fluent UI

Backend: •NodeJS •Google APIs •OAuth2 •MongoDB Atlas •MongoDB •SQL

DevOps: •Linux •Ubuntu •GIT •GitHub

Tools: •VS Code •Postman •Netlify •Vercel

Projects

TIC-TAC-TOE GAME

[Live link](#)

•Tic-Tac-Toe Game Project: Developed an interactive Tic-Tac-Toe game using JavaScript (or relevant technologies), focusing on user experience and game logic. The project demonstrates proficiency in DOM manipulation, handling game states, and implementing responsive design for various screen sizes. Additionally, it showcases strong problem-solving skills and the ability to create engaging user interfaces..

Date Time DASHBOARD

[Live link](#)

•Date and Time Teller Dashboard Project: Developed a comprehensive date and time teller dashboard using HTML, CSS, and JavaScript. The dashboard displays the current time, calendar, and allows users to add tasks and set reminders. It also features a stopwatch, providing enhanced time management functionalities. This project demonstrates proficiency in front-end development, building interactive user interfaces, and managing time-based features efficiently.

TODO List

[Live link](#)

- React To-Do List Project: Developed a feature-rich to-do list application using React, providing users with an intuitive interface to add, edit, and manage their daily tasks. The project leverages React's component-based architecture, enabling efficient state management and seamless task updates. Key functionalities include task completion tracking, real-time task updates, and a responsive design that adapts to various screen sizes. This project showcases expertise in building interactive, user-focused applications while demonstrating a strong grasp of front-end development principles with React.

FAQ's start journey as a webdevelopers

[Live link](#)

- FAQs for Starting a Journey as a Web Developer: Developed a detailed FAQ section to guide aspiring web developers, covering essential topics such as learning HTML, CSS, JavaScript, and React.js. The resource helps beginners understand key concepts, choose the right frameworks, build a portfolio, and grasp version control with Git. It also offers insights into using React.js for building dynamic web applications, emphasizing component-based architecture and state management. This project highlights strong communication skills, technical knowledge, and a passion for supporting others in their journey to becoming successful web developers.
